#### Hoshizaki Water Filters

- Keep ice makers functioning at full capacity
- Reduce up to 99.9% of disinfectant chlorine from incoming water supply, eliminating off tastes and odors of the ice
- HF Filter will filter out dirt and rust particles as small as 1/2 micron producing crystal clear ice (99+% reduction)
- Decrease machine maintenance by reducing lime scale build-up

Reliability is a beautiful thing™

**E-10 PREFILTER**

**E-20 PREFILTER**

E-10 and E-20 Prefilters can be used for post mix applications. Everpure prefilters are designed to increase the life of Everpure pre-coat water filters in areas with an unusual amount of dirt in the water. With a 10 micron (nominal) rating, the economical Everpure prefilter traps much of the dirt which contributes to scale buildup in ice makers, and clogs the delicate orifices of other water-using equipment.

When you install an Everpure prefilter, the pre-coat filters can concentrate on what they do best: remove particles 1/2 micron and larger in size.

#### Standard No. 42: Aesthetic Effects Chemical Unit

Taste and Odor reduction and Chlorine reduction: Class 1

#### Mechanical Filtration Unit

Particulate reduction: Class 1 (99.9+% reduction of particles one-half micron and larger in size)

#### Standard No. 53: Health Effects

Mechanical Filtration Unit  
Cyst reduction  
Turbidity reduction  
Asbestos reduction

The HC and HF Filters and their respective cartridges have been tested and listed by NSF only for the functions listed above. Check for compliance with state and local laws and regulations. Do not use where the water is microbiologically unsafe, or with waters of unknown quality without adequate disinfection before or after the unit. The HF filter can be used with water that may contain filterable cysts.

We reserve the right to change specifications without notice.
